PROFESSIONAL SUMMARY

Full-stack developer and data engineer with hands-on experience building production web applications, ETL pipelines, and AI-integrated systems. Delivers React and Next.js frontends paired with Python/FastAPI backends, DuckDB and Supabase databases, and automated pipelines via GitHub Actions. Integrates Claude API and Anthropic SDK into multi-agent workflows, scoring models, and automated reporting systems.

EXPERIENCE

Analyst

2025 – Present

IIIDM International Consulting, s.r.o.

Czech Republic

- Built React frontends with Python backends for an international consulting firm.
- Maintained DuckDB and Supabase databases with ETL pipelines and automated monthly updates, achieving 100% data reliability.
- Developed and deployed production applications: iidmic.com, vykonar.iidmic.com, prispevkar.cz.

Freelance Full-stack Developer

2024 – Present

Self-employed

Czech Republic

- Built full-stack web applications for clients using React, Next.js, and FastAPI, including admin panels and payment gateways.
- Built TrefKaru (trefkaru.cz): a fullstack automotive data platform with a 5-layer ETL pipeline (RAW to STAGING to CORE to METRICS to MART), web scraping from Bazos.cz and Sauto.cz, FastAPI backend, React frontend with 3D visualizations, and a multi-agent system driven via Slack and GitHub Actions.
- Engineered CzechPayGap: a data pipeline comparing official Czech Statistical Office wage data with real job listings from 14+ portals, with automated daily scraping via GitHub Actions, DuckDB analytics, and an interactive Streamlit dashboard.
- Developed Singing Lessons Platform (vyukazpevudrahenice.cz): a full web app with Next.js frontend, Convex backend, booking system, admin panel, Comgate payment gateway, and SEO with structured data (schema.org).
- Built BTC Trading Engine: a backtesting system on historical data (2020-2026) with Claude AI advisor, trading bots, and daily Slack reports.
- Designed Market Intelligence Engine: a data harvesting system tracking service pricing and provider availability across B2B sectors with geospatial analysis and automated competitive benchmarking.
- Delivered responsive client websites for small businesses with SEO, custom branding, mobile-first design, and high PageSpeed scores.

Founder and Project Administrator

2022 – 2025

Valeolla Consulting, s.r.o.

Czech Republic

- Founded and operated a consulting firm specializing in project documentation and administrative infrastructure.

PROJECTS

Simon

- Developed a local AI orchestrator in Rust with a modular monolith architecture, event-driven design, CLI interface, and planned parallel inference support via Ollama and Claude API (in active development).

CERTIFICATIONS

- Google Cloud Data Engineer Professional Certificate
- Data Analyst Professional Certification

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Rust

Frontend: React, Next.js, TailwindCSS, HTML/CSS

Backend: FastAPI, Convex, REST APIs, Supabase

Data: DuckDB, Pandas, ETL Pipelines, Web Scraping, Streamlit

AI and ML: Claude API, Anthropic SDK, Multi-agent Workflows, Prompt Engineering, Claude Code, AI Code Review
