SUMMARY

I am a dedicated Technical Data Engineer and Full-stack Developer with a proven ability to connect backend architecture with user-friendly interfaces. Specializing in automated data solutions and AI integration, I excel in optimizing data workflows and enhancing user experiences. My focus has been on developing efficient pipelines and scoring models that deliver value and insights consistently. Extensive background in public sector operations through internships at Czech ministries (MMR, MPO, MZP), combined with a proven ability to transform raw data into actionable competitive advantages.

EXPERIENCE

Full-stack Developer & Data Systems Specialist

IIDM international consulting, s.r.o.

2025 - Present Czech Republic

International consulting company specializing in data systems and analytics.

- Architect and maintain data-heavy applications for seamless integration between Python backends and interactive frontends.
- Orchestrate and monitor automated monthly update pipelines for global clients, ensuring 100% data reliability.
- Manage complex database systems (DuckDB, Supabase) with a focus on ETL optimization.

Freelance Web Developer

Self-employed

2025 - Present Remote

Freelance developer providing web development solutions to various clients.

- Design and deploy responsive web applications using Node.js and TailwindCSS.
- Focus on clean user experience and scalable performance enhancements.

Founder & Project Administrator

Valeolla consulting, s.r.o.
