MARCELA REZKOVA

> Full-stack Developer & Data Engineer

React · Next.js · Python · TypeScript · Czech Republic

Fullstack apps powered by data & AI. React and Next.js frontends with Python/FastAPI backends — admin panels, booking systems, payment gateways, REST APIs. ETL pipelines, web scraping and DuckDB/Supabase databases with automated daily pipelines via GitHub Actions. AI integration with Claude API and Anthropic SDK — multi-agent systems, AI advisors, scoring models and automated reports.

\$ EXPERIENCE

Analyst2025 – Present

IIIDM International Consulting, s.r.o.

- React frontends with Python backends for an international consulting firm.
- DuckDB and Supabase databases, ETL pipelines, automated monthly updates with 100% data reliability.
- Production apps: iidmic.com, vykonar.iidmic.com, prispevkar.cz.

Freelance Full-stack Developer2025 – Present

Self-employed

Fullstack web applications (React, Next.js, FastAPI). Client websites with admin panels, payment gateways and booking systems. Data pipelines and AI integration. Selected projects:

TrefKáru

trefkaru.cz — fullstack automotive data platform with a 5-layer ETL pipeline (RAW → STAGING → CORE → METRICS → MART). Web scraping from Bazos.cz and Sauto.cz, FastAPI backend, React frontend with 3D visualizations, multi-agent system driven via Slack and GitHub Actions.

Simon

— local AI orchestrator in Rust (in active development). Modular monolith with event-driven architecture, CLI interface and planned parallel inference (Ollama + Claude API).

CzechPayGap

— data pipeline comparing official Czech Statistical Office wage data with real job offers from 14+ portals. Automated daily scraping via GitHub Actions, DuckDB analytics, interactive Streamlit dashboard.

BTC Trading Engine

— comprehensive BTC trading system with custom backtesting engine on historical data (2020–2026). Claude AI advisor, trading bots, gem scanner and daily Slack reports.

Market Intelligence Engine

— data harvesting system tracking service pricing and provider availability across B2B sectors. Geospatial analysis by region and automated competitive benchmarking.

Singing Lessons Platform

vyukazpevudrahenice.cz — complete web app for private singing lessons. Next.js frontend with Convex backend, booking system, admin panel and Comgate payment gateway. SEO with structured data (schema.org).

HowToGetOpinion

— web app documenting a public social experiment: 100K followers across TikTok, Instagram, YouTube and LinkedIn in 90 days. Waitlist system, real-time day counter, cross-platform content distribution.

Client websites

— modern responsive web applications for small and medium businesses — kurzystudiomirage.cz, kadernicehelena.cz, smooth-development.com. SEO, custom branding, mobile-first, high Google PageSpeed scores.

Founder & Project Administrator2022 – 2025

Valeolla Consulting, s.r.o.

- Consulting firm focused on project documentation and administrative infrastructure.
